Tutorial 11: *Exploring Object-Based Programming*
Textbook Corrections

1. **Page JVS 676**

   In the middle of the page:

   ```
   myDeck.dealTo(myHand, 5);
   ```

   should be...

   ```
   myDeck.dealTo(myHand);
   ```

   Note: *The line of code must match the line that was shown on page JVS 672.*

2. **Page JVS 686**

   Section 3: The paragraph that follows the example code mentions that object2 is the object that initiates the `showMore()` method; however, `showMore()` is missing from the example code. The author should have provided the following example code:

   ```
   object1.showInfo = function() {
      alert(this.name);
      function showMore(object2) {
         alert(this.name);
      }
   }
   ```
